

Cynap Pure (Next Gen)

INITIAL SETUP/INSTALLATION

1. Connect an HDMI cable between Cynap Pure (Next Gen) and your display monitor or projector
2. Connect an Ethernet cable to the PoE+ port to power the device and connect to your network
3. Optional for touch screens: Connect a USB cable between your Cynap and your display to enable touch functionality
4. Press the power button to switch on the device
5. Start screen sharing

START SCREEN SHARING

All Apple, Windows, Android and Chrome OS devices

Connect to the Cynap Pure (Next Gen) access point, either by scanning the QR code on screen or connecting manually. Share your screen using AirPlay, Chromecast or Miracast, depending on your device.

Windows

Press the keys

on the keyboard

Apple

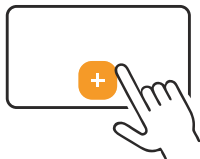

Click on

on the menu bar

CONTROL THE DEVICE

Add cameras, files, whiteboard and more with the **orange source button** and manage up to four screens.

Option

How to start

Touchscreen

Tap the screen

Computer mouse

Connect a mouse via USB

Browser

Enter the IP address shown at the top of the screen into your browser's address bar
